CUT THIS OUT

OLD ENGLISH RECIPE FOR CATARRH. CATARRHAL DEAFNESS AND HEAD NOISES

HEAD NOISES

If you know of someone who is troubled with Catarrhal Deafness, head noises or ordinary entarrh, cut out this formula and hand it to them and you may have been the means of saving some poor sufferer perhaps from total deafness. In England scientists for a long time past have recognized that catarrh is a constitutional disease and necessarily requires constitutional treatment.

Sprays, inhalers and nose douehes are liable to irritate the delicate air passages and force the disease into the middle car, which frequently means total deafness, or else the disease may be driven down the air passages towards the lungs, which is equally as danserous. The following formula, which is used extensively in the damp English climate, is a constitutional treatment and should prove especially efficacious to sufferers here who live under more favorable climate conditions.

Secure from your druggist I cunce of Parmint (double strength). Take this home and add to it & pint of hot water and a little granulated susar: stir until dissolved. Take one tablespoonful four times a day. This will often bring quick relief from distressing head noises. Clogged nostrifs should open, breathing become easy and hearing improve as the inflammation in the eustachian tubes is reduced. Parmint used in this way acts directly upon the blood and mucous surfaces of the system and has a tonic action that helps to obtain the desired results. The preparation is easy to make, costs little and is pleasant to take. Every person who has catarrh or head noises or is hard of hearing should give this treatment a trial.—Adv.
